

Kapil Ravi Kumar

Sector - 9A Gurgaon

8588854394 | Kapravsik1313@gmail.com

Objective

To obtain an entry-level position at a respected organization and utilize the educational qualifications I've obtained at IIT Dwarka (GGSIPU). As a recent graduate, I am seeking a role which allows me to continue learning and perfecting my skills as I provide high-quality work, and encourages me to flourish as a Medical Lab technologist.

Education

- **GITM Noida** 2021-2023
MSc MLT
- **(GGSIPU)- Guru Gobind Singh Indraprastha University, Dwarka** 2016-2019
BSc MLT
6.08
- **Jamia Hamdard University, Delhi** 2022-2023
Food Safety and Quality Management
- **BSEH** 2013
Medical - Senior Secondary XII
67.4

Skills

- Laboratory assay analysis
- Handling of Equipment, glasswares and Instruments with proper aspects.
- Knowledge of testing, calibration and QC controls of automatic analysers, Electrolyte analysers and other devices.
- Basic Knowledge of PCR and Molecular Techniques.
- Manually analysis & diagnosis of samples
- Using scientific rules and methods to solve problems.
- Performed diagnostic tests on specimens and determine the sensitivity of antigens.
- Systematic approach and organization skills in order to store and segregate samples/reports properly.
- Learning Strategies : Selecting and using training/instructional methods and procedures appropriate for the situation when learning or teaching new things.
- Troubleshooting - Determining causes of operating errors and deciding what to do about it.
- Working collaboratively
- Leadership and people skills, Decision-making & Critical thinking
- Team & Time management
- Reliable and trustworthy
- Quality assurance controls
- Knowledge of MS Office & Basic Softwares.
- Social interaction, public and patient dealing
- Friendly, positive attitude and Enthusiastic approach

Experience

- **Dr. Hedgewar aarogaya sansthan , Delhi**

Medical Lab Technician

- Followed laboratory guidelines for handling biological specimens.
- Followed strict aseptic techniques to protect patients when collecting blood and tissue samples.
- Conducted blood counts and other tests to support safe transfusion processes.
- Reviewed patient data, prepared data reports and signed off on release of information requests.
- Maintained clean and fully operational laboratory equipment. Cleaned and sterilized lab area, tools and equipment.
- Differentiated between significant and insignificant laboratory finding on the basis of patient's clinical history and lab findings.
- Proper handling of equipments (pipettes, centrifuge, machines like analyzers) and handling of glassware by appropriate disposal of hazardous wastes and sharps.
- Collection of samples of body fluids like blood by performing venipuncture by vacutainers, syringes in proper containers and proper storage and transportation.
- Recorded control values from technical instruments to maintain reliability and validity of test results.
- Conducted multiple tests at once using automated equipment and computerized instruments.
- Conducted quality control checks, calibration and technical troubleshooting of hematology analyzer.
- Performed biochemistry analysis, urinalysis and hematology for multiple patients daily.
- Operated equipment such as centrifuge, Biochemistry semi-analyzers (MICRO LAB RX-50 , RX 50V).
- Hematology auto-analyzers (Siemens , Medonic , Mindray) to analyze bodily fluids for anomalies.
- Assessed blood samples for transfusions by determining cell morphology, number of cells, blood type/groups and other relevant information.
- Worked in respective laboratories in various departments :
 - Hematology lab
 - Biochemistry lab
 - Histopathology lab
 - Blood bank
 - Cytology lab
 - Microbiology labs (virology, parasitology, bacteriology, mycology laboratory)
 - Staining, FNAC, AST, ELISA, biochemical tests like urease, catalase, coagulase.
- Applied knowledge of microbiology, chemistry and hematology daily.
- Communicated with physicians to discuss lab test findings, procedures and other relevant information.
- Reviewed test results to confirm accuracy and diagnosed causes behind irregular findings.

Medical Lab Technician

- Followed laboratory guidelines for handling biological specimens
- Maintained clean and fully operational laboratory equipment. Cleaned and sterilized lab area, tools and equipment.
- Differentiated between significant and insignificant laboratory finding on the basis of patient's clinical history and lab findings.
- Proper handling of equipments and devices (pipettes, centrifuge, machines like analyzers of CBC, ESR, Serum-Electrolyte etc.) and handling of glassware by appropriate disposal of hazardous wastes and sharps.
- Recorded QC control values from technical instruments to maintain reliability and validity of test results.
- Conducted quality control checks, calibration and technical troubleshooting of Hematology analyser, Biochemistry analyser, Electrolyte analyser, Urine analyser etc.
- Performed biochemistry analysis, urinalysis and hematology for multiple patients daily.
- Conducted multiple tests like (LFT, KFT, Lipid, Blood Sugar, CSF and other body fluids) at once using automated equipment and computerized instruments
- Operated equipment such as centrifuge, Urine analyser (URISED Pro, LABUMAT), Biochemistry semi-analyzers (MICRO LAB RX-50 , RX 50V).
- Hematology auto-analyzers (Siemens , Medonic , Mindray) to analyze bodily fluids for anomalies.
- Assessed blood samples for transfusions by determining cell morphology, number of cells, blood type/groups and other relevant information.
- Followed strict aseptic techniques to protect patients when collecting blood and tissue samples.
- Collection of samples of body fluids like blood by performing venipuncture by vacutainers, syringes in proper containers , proper storage with color coding vials and transportation to the respective lab.
- Conducted blood counts, Blood grouping, cross matching and other tests to support safe transfusion processes.
- Reviewed patient data, prepared data reports and signed off on release of information requests.
- Communicated with physicians/SR/HOD to discuss lab test findings, procedures and other relevant information.
- Reviewed test results to confirm accuracy and diagnosed causes behind irregular findings.
- Worked in respective laboratories in various departments :
 - Hematology Lab
 - CTC (covid testing centre)
 - Biochemistry lab
 - Emergency Lab
 - Histopathology lab
 - Blood bank
 - Cytology lab
 - Microbiology labs (virology, parasitology, bacteriology, mycology laboratory) tests like HIV , HBsAg, Hep A/B/C , Typhi-dot widal , CRP , Dengue and Malaria etc.
 - Staining (like for Hematological and FNAC tests).
- Worked on respective devices :
 - Electrolyte analyser (combi-line)
 - Biochemistry analyser 5-parts (HUMASTAR600)
 - Biochemistry analyser 3-parts (Erba H360)
 - CBC analyser (YUMIZEN H2500)

- Coagulation analyser (STAGA compact max-3
- ESR (Roller 20LC)
- HB1AC Glycohemoglobin analyser (TOSOH HLC- 723GX)
- Snibe Maglumi 600 Chemiluminescence Immunoassay Analyzer
 - Applied knowledge of microbiology, chemistry and hematology daily.

Interests

- Participation in Social activities
- Seminars, Webinars and Projects
- Computer skills : MS office , Tally and other Basic Softwares
- Reading and Writing
- Sports and adventure
- Singing and Music

Achievements & Awards

- State Level Player in Cricket.
- District Level Player in Cricket.
- District Level Player in Handball and Throwball.
