

HARSHITA GAURAVI

BSC. MSC (MICROBIOLOGY)

Respected official

I am motivated to contact you upon learning that your organization has a vacancy that is suitable for me. As a skilled and highly educated professional with 1 year of job experience while performing various microbial lab testing, validation and scientific writing, I am confident of my ability to make a significant contribution to your organization.

harshitajung007@gmail.com

In my past positions it was my responsibility to supervise and perform tests on various microbiological activities of soil while maintaining knowledge on various testing methods and performed all manual operations on various supplies and developed and maintained validation in all protocols for various environmental controls. I have worked as an assistant scientist and developed a strong understanding of the scientific writing process.

I am grateful for your time and attention in examining my resume. Please find my resume which is attached to this document for your kind consideration.

I am enthusiastic and ready to discover new things that I have yet to experience and accomplish. I look forward to discussing my application with you further.

Sincerely

Harshita Gauravi
