INTRODUCTION

Dedicated Cytogenetic Technician with a Bachelor's degree in Zoology and a Master's degree in Forensic Science. Experienced in conducting cytogenetic analyses, karyotyping, and FISH techniques. Skilled in interpreting genetic data and maintaining laboratory standards. Passionate about contributing to genetic research and diagnostic efforts. Seeking a challenging role where I can utilize my expertise in cytogenetics and biology to support research initiatives and advance genetic diagnostics in a dynamic laboratory setting.

STRENGTHS AND EXPERTISE

Microsoft Office	Sample handling	Team Leadership
Equipment calibration	Lab information system (LIMS)	Karyotyping
Quality Control & assurance	Microscopy & Instrument handling	FISH

PROFESSIONAL EXPERIENCE

NEUBERG DIAGNOSTICS PVT. LTD. , Ahmedabad
Laboratory technician (Cytogenetics department)

July 2023- May 2024

- Performed cytogenetic testing procedures, including cell culture, chromosome preparation, and banding techniques (G-banding).
- Performed cytogenetic tests for Karyotyping from Blood, Bone Marrow and Amniotic Fluid.
- Also worked on Chorionic villus samples and Product of Conception.
- Handling and Captured Metaphases for analysis using Zeiss Automated microscope Imager Z.2.
- Prepared and executed fluorescence in situ hybridization (FISH) assays.
- Maintained laboratory equipment and instrumentation, troubleshoot technical issues, and performed routine maintenance tasks to ensure optimal performance.
- Adhered to laboratory protocols, quality control measures, and regulatory requirements to ensure accuracy and reliability of test results.
- Collaborated with colleagues, participated in laboratory meetings, and contributed to the development and optimization of laboratory procedures.
- Assisted in the training of new laboratory personnel.

REGIONAL FORENSIC SCIENCE LABORATORY, Surat
Intern , Biology Department

Feb 2023- March 2023

- Analyzed numerous evidences for the presence of biological fluids, including blood, urine, and other bodily fluids, using chemical testing.
- Conducted stain identification tests, including serological tests such as absorption elution tests, to confirm the blood group in the present bodily fluid.
- Assisted in the DNA department by extracting DNA from diverse biological sources, including bones, teeth, blood stains, and fetal tissue, utilizing established protocols and techniques.

Volunteer

- Participated in community service projects promoting education, health, and environmental conservation.
- Assisted in organizing health camps, blood donation drives, cleanliness drives, and disaster relief efforts.
- Facilitated educational programs and skill development workshops for underprivileged individuals.
- Collaborated with team members to plan and execute community service initiatives effectively.

EDUCATION**Gujarat University, Ahmedabad (2021-2023)**

Master of Science in Forensic Science

3.20/4 GPA

St. Xavier's College , Ahmedabad (2018-2021)

Bachelor of Science in Zoology

3.08/4GPA

J.G. International School , Ahmedabad (2016-2018)

Indian Certificate of Secondary Education (ISCE)

3.42/4 GPA

CERTIFICATE

2122edx013: Forensic Science: DNA Analysis by University of Cambridge

THESIS WORK**ESTIMATION OF STATURE FROM HAND MEASUREMENTS IN GUJARATI POPULATION**

- Reviewed existing literature on methods of stature estimation in forensic anthropology, with a focus on hand measurements and their relationship to overall body size.
- Executed a research protocol to collect hand measurements and stature data from a sample population of diverse demographic backgrounds.
- Analyzed collected data using statistical methods to identify correlations between hand measurements and stature.
